Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's representative, Brian Hollis, contacted the Office to discuss the final rejection mailed on August 24th, 2007. Specifically, it was described how the structure of Hopf did include a torque-limiting feature as well as the functional language. Primarily, it was stated that additional structure further defining the cap and base in terms of shape, engagement with the post (channel and collar) and teeth protrusions would help define over Hopf. In regard to Kuras et al, additional limitations describing the shape of the cap and base again would assist in defining applicant's device over the prior art. Bremer et al was stated as primarily being useful for the teaching of force-limiting. Applicant was reminded to review to the additional cited prior art as well as to be aware that additional search and consideration would be conducted upon the submission of an amendment.
